

MOTIONWEAR FABRICS & COLORS

Motionwear fabrics are the best available, and are known for great colorfastness, comfort, and wearability. Most styles are available in all fabrics and colors (exceptions are noted with styles).

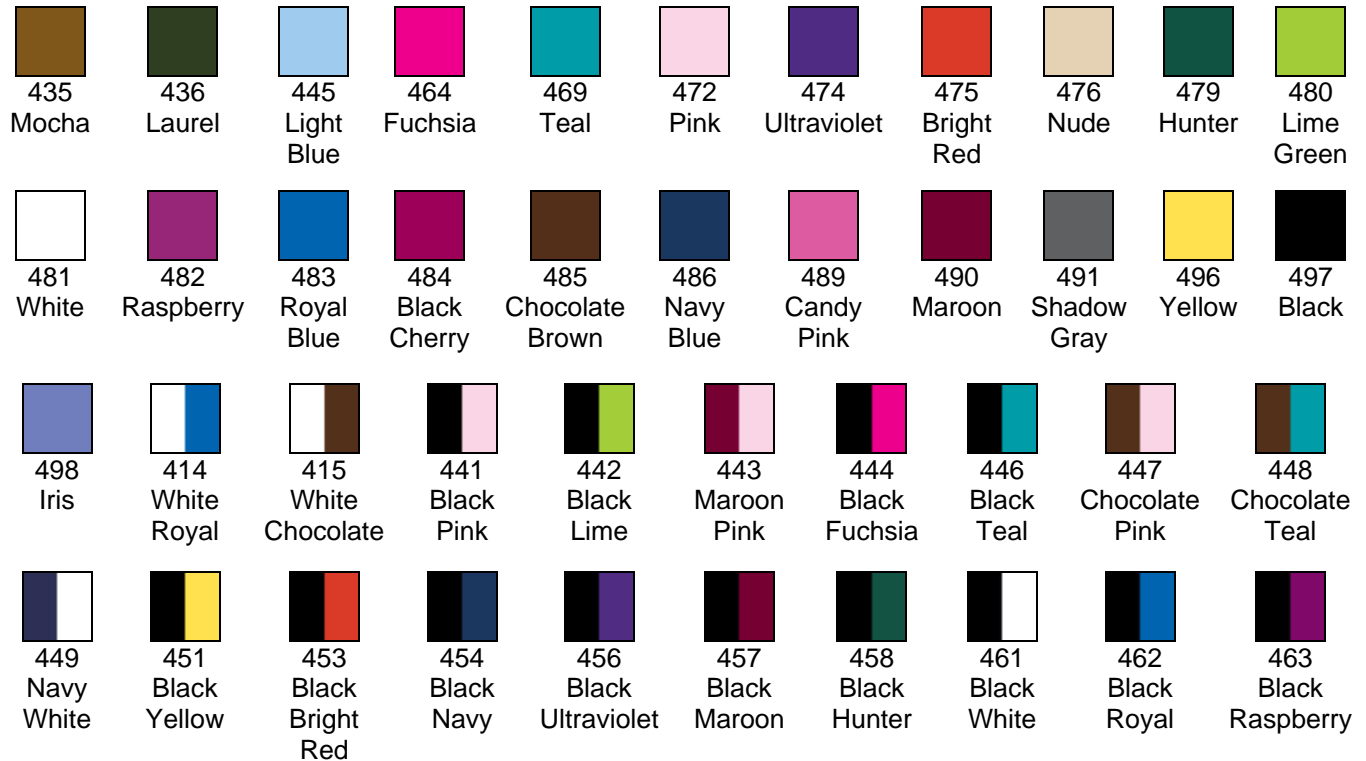

COTTON 88% Cotton 12% Spandex

Motionwear cotton is a soft, heavy circular jersey knit with plenty of spandex for stretch and support. It holds color well and provides a comfortable fit.

SILKSKYN 91% Tactel® Nylon 9% Spandex

Silkskyn is a modern, high-tech fabric uniquely suited to the demands of the dancer, gymnast, or active performer. Micro fiber knitting creates a soft buttery feel in this Tactel® Spandex jersey knit. Silkskyn's advanced fiber design allows the fabric to breathe. Special engineering of the yarns give the fabric the ability to rapidly move moisture away from the body. This soft hand, combined with the breathability and moisture management make Silkskyn a favorite fabric with all performers.

Motionwear® is a registered trademark of Motionwear LLC.

Tencel® is a registered trademark of Tencel Ltd. for lyocell.

Lycra® and LycraSoft® are registered trademarks of Invista for spandex elastomer.

Tactel® is a registered trademark of Invista.

MOTIONWEAR FABRICS & COLORS

VELOURS 90% Polyester 10% Spandex

Plush poly spandex velours give a luxurious texture and wear well. All velours provide rich color choices that will provide an aura of gentle beauty. Glitter adds a sparkle and shine for the classroom or stage. The durability of the glitter finish is not guaranteed. It is a normal characteristic, and not considered defective, for glitter treatments to shed and for foil surfaces to wear – especially in high abrasion areas.

TEAMWEAR 90% Microfiber Polyester 10% Spandex

TeamWear is a modern, high-tech fabric uniquely suited to the demands of the active performer. A soft, yarn dyed microfiber fabric, TeamWear combines these important technologies into one great product:

- Special fiber design creates a garment that is exceptionally soft.
- Microfiber yarn allows the fabric to breathe rapidly and wick moisture away from your body.
- BodyCare® treatments enhance performance through U.V. inhibitors and Anti-Microbial protection.

TeamWear – a fusion of comfort, fashion, and function. TeamWear is stronger, lighter, faster drying and more resistant to odor than typical activewear fabrics.

MOTIONWEAR FABRICS & COLORS

PRINTED FABRICS

90% Nylon 10% Spandex or 80% Nylon 20% Spandex

- BLENDER BLUE: Water-like shine added to radiant hues of blue on poly spandex.
- DREAMY PURPLE: Whimsical poly spandex print dusted with silver confetti foil.
- CAMO GIRL: Camouflage with a modern twist in shades of mocha, salmon, and hunter green with an added mist of foil on poly spandex.
- LUXE LACE BERRY: Delicate lace print on Motionwear's Silkskyn.
- NOLITA: Inspired by the classic prints of Italian designer Emilio Pucci, Nolita is a bold pattern on poly spandex in vivid colors that coordinate with Motionwear's Silkskyn palette.
- OLIVE CHEETAH: Wild cheetah print updated with iridescent olive foil highlights on a poly spandex base.
- FRUIT STRIPE: Playful multi-colored iridescent foil stripes provide a burst of color on a white poly spandex base.
- GIRAFFE: Inspired by the natural beauty of African animals, Giraffe is a fun print in fashionable shades of brown on a poly spandex base.

It is a normal characteristic, and not considered defective, for glitter treatments to shed and for foil surfaces to wear – especially in high abrasion areas.

MOTIONWEAR FABRICS & COLORS

FASHION FABRICS

90% Nylon 10% Spandex OR 80% Nylon 20% Spandex

Impressive and attention-getting, this collection of prints and gleaming solids make a powerful statement on any gymnast. Choose from SHINE ON, ENERGY, and SHATTERED GLASS palettes to create a striking presentation for your team. It is a normal characteristic, and not considered defective, for glitter treatments to shed and for foil surfaces to wear – especially in high abrasion areas.

- SHINE ON: A dazzling effect in an array of colors on nylon spandex.
- IRIDESCENT SHINE ON: Layers of exotic colors accented with iridescent foil on nylon spandex.
- ENERGY: Dimensional accents created by flecks of silver on solid colored nylon spandex.
- SHATTERED GLASS: Gem-like brilliance captured on high quality nylon spandex.

MOTIONWEAR FABRICS & COLORS

TENCEL[®] 88% Tencel[®] 12% Spandex

Motionwear's Tencel is a rich, soft fabric that maximizes comfort and function as well as being breathable, absorbent, and environmentally friendly. We use LycraSoft[®] for a soft, comfortable stretch. The strength of Tencel fibers provides long lasting garments that are easy to care for and quick to dry. Tencel costs more in the beginning, but lasts longer, making it an excellent value.
